# Priyanka Maroti

Hyderabad, Telengana | +91 8945523084 | priyankamaroti04@gmail.com | linkedIn

## OBJECTIVE

Results-oriented Computer Science graduate with hands-on experience in data science, HR analytics, and project leadership across corporate and academic environments. Skilled in applying Python, SQL, and machine learning to analyze workforce and business data, build predictive models, and deliver actionable insights. Recognized for combining technical expertise with organizational management to drive efficiency, optimize performance, and support strategic decision-making.

## EDUCATION

**Kalinga Institute of Industrial Technology (KIIT)** **Sep 2022 - 2026**
*B.Tech, Computer Science* *Bhubaneswar, Orissa*
• **Coursework:** DSA, OOPS, Operating System, Data Science

**Birla Balika Vidyepeeth** **Apr 2020 - Mar 2022**
*Higher Secondary School Certificate* *Pilani, Rajasthan*

## EXPERIENCE

**Knowfinity Academy LLP | *HR*** **Aug 2025 - Present**
- Led end-to-end workforce management for a growing team, overseeing recruitment, onboarding, performance tracking, and employee engagement initiatives to improve retention and productivity.
- Spearheaded cross-functional projects as Project Lead, coordinating between departments to ensure timely delivery of organizational goals and process improvements, enhancing operational efficiency by 20%.
- Utilized data analytics to evaluate workforce performance, identify key HR trends, and provide actionable insights that informed strategic decision-making and optimized resource allocation.

**Satviki Exports Pvt. Ltd. | *Digital Marketing & Export Data Management Intern*** **May 2025 - Aug 2025**
- Accomplished a 37% increase in lead conversions as measured by campaign CTR by optimizing Google Ads through A/B testing, refined keyword targeting, and budget allocation, which improved ROI and reduced cost per acquisition.
- Achieved a 42% boost in product visibility as measured by Amazon Marketplace rankings by optimizing product listings, enhancing keyword relevance, and implementing data-driven pricing strategies aligned with customer buying behavior.
- Improved brand engagement by 48% as measured by social media analytics by streamlining content calendars, leveraging SEO-driven posts, and running cross-platform campaigns, resulting in higher reach, audience retention, and follower growth.

**IIT Guwahati | *Data Science Intern*** **May 2025 - Jun 2025**
- Accomplished 89% prediction accuracy as measured by model evaluation metrics by applying advanced machine learning algorithms, feature engineering, and robust cross-validation techniques using Python, Pandas, and Scikit-learn.
- Delivered a 23% improvement in Sharpe ratio as measured by algorithmic trading backtests by developing LSTM-driven models with temporal convolutional layers and implementing online learning frameworks.
- Reduced preprocessing errors by 28% as measured by pipeline efficiency reports by automating data cleaning, imputation, and transformation workflows for large-scale structured and unstructured datasets.

**Metvy | *Sales and Marketing Intern*** **Oct 2024 - Nov 2024**
- Increased enrollment conversions by 35% as measured by new customer sign-ups by executing targeted digital campaigns, optimizing content strategies, and leveraging audience segmentation techniques.
- Enhanced brand visibility by 42% as measured by social media impressions by creating persuasive promotional materials, engaging client communications, and implementing structured outreach campaigns.
- Secured sponsorship leads by 20% as measured by client partnership inquiries by pitching learning cohorts, delivering tailored value propositions, and building trust-based customer relationships.

## PROJECTS

**CreditRiskViz: Exploratory Data Analysis of Loan Applicant Data**
- Executed comprehensive EDA using Python (Pandas, Matplotlib, Seaborn) to uncover demographic and financial risk patterns, improving credit risk segmentation accuracy by 25%.
- Automated data cleaning, imputation, and feature engineering workflows, reducing preprocessing errors by 30% and enhancing dataset readiness for predictive modeling.

**Comparative Evaluation of Machine Learning Models for Obesity Risk Prediction**
- Built and optimized Gradient Boosting and Random Forest models, achieving 96.4% prediction accuracy and a 20% improvement in F1-score across comparative benchmarks.
- Developed a CLI-based health analytics tool enabling real-time obesity risk prediction and personalized recommendations, improving accessibility for non-technical users.

## CERTIFICATES

- Digital Marketing and Export Data Management
- Model United Nations 2024 – Delegate in ECOSOC
- Project Completion IIT Guwahati (May-June 2025)
- IIT Guwahati Internship Program (May-June 2025)
- Sales and Marketing – Metvy(october 2024--November 2025)

## SKILLS

**Human Resources & Management:** Workforce Management & Recruitment, Employee Engagement & Retention Strategies, Performance Tracking & Reporting, Project Leadership & Cross-functional Coordination, Data-Driven HR Decision Making
**Data Science & Analytical Skills:** Exploratory Data Analysis (EDA), Statistical Modeling & Predictive Analytics, Feature Engineering & Model Evaluation, Data Cleaning, Imputation & Transformation, Machine Learning (Gradient Boosting, Random Forest, LSTM), Data Visualization (Matplotlib, Seaborn, Power BI)
**Programming & Tools:** Python, SQL, Java, C, Pandas, NumPy, Scikit-learn, Power BI, Microsoft Excel, VS Code, Git, Canva, Overleaf, Microsoft Word & PowerPoint
**Soft Skills:** Leadership & Teamwork, Communication & Problem Solving, Analytical Thinking, Time Management & Adaptability
